**Introduction 1**

**About this document 15**

**MDG 1: Eradicate extreme poverty and hunger 23**

- 1.1. - The link between unwanted pregnancy, fertility, population growth, and aggregate economic growth 27
  - 1.1.1. - The growth effects associated with youth dependency ratios and the demographic bonus 34
  - 1.1.2. - The growth effects associated with intergenerational transfers 39
  - 1.1.3. - The growth effects associated with population ageing 41
  - 1.1.4. - The link between morbidity, economic growth, and poverty reduction 42
- 1.2. - The importance of distributional effects 50
  - 1.2.1. - Structural and transitory poverty 53
  - 1.2.2. - The link between fertility and socioeconomic mobility 56
  - 1.2.3. - The demographic bonus in the context of economic and demographic inequality 59
  - 1.2.4. - The DMPAP projection model for poverty reduction 67
  - 1.2.5. - The link between poverty and individual morbidity risks 77
  - 1.2.6. - The link between poverty and unwanted pregnancies 84
  - 1.2.7. - Poverty and critical population groups 88
    - 1.2.7.1. - Poverty and youth 89
    - 1.2.7.2. - The role of gender factors 97
    - 1.2.7.3. - Poverty and the elderly 105
    - 1.2.7.4. - Racial and ethnic minority groups 114
    - 1.2.7.5. - Physically and mentally disabled people 120
    - 1.2.7.6. - Internally displaced people (IDP) 126
- 1.3. - The link between poverty and internal migration 134
- 1.4. - The link between poverty and international migration 139
  - 1.4.1. - Remittances 144
    - 1.4.1.1. - Macroeconomic equilibrium 148
    - 1.4.1.2. - Economic multipliers and growth effects 149
    - 1.4.1.3. - Distributional effects on poverty reduction 151
  - 1.4.2. - Diasporas, return migration, and transnational activities 156
- 1.5. - Conversion effects 164
- 1.6. - The link between population growth and hunger 166
  - 1.6.1. - The role of population growth and composition in food security 167
  - 1.6.2. - The causal link between malnutrition and reproductive patterns 168
- 1.7. - A new Target under MDG 1: full and productive employment and decent work for all 172
  - 1.7.1. - Youth employment 172
  - 1.7.2. - Decent work for other population groups 174

**MDG 2: Achieve universal primary education 183**

- 2.1. - The link between macro-demographic trends and potential investments in education 185
- 2.2. - The link between educational achievement and reproductive patterns in the families of origin 196
- 2.3. - The link between educational outcomes and the SRH of adolescents 203
  - 2.3.1. - Adolescent pregnancy and educational achievement 203
  - 2.3.2. - Sexual and life skills education 208
- 2.4. - Brain drain and brain gain 210

**MDG 3: Promote gender equality and empower women 219**

- 3.1. - Reproductive rights 223
- 3.2. - Gender-based violence 227
- 3.3. - The link between reproductive and economic empowerment 232
- 3.4. - Migration and gender equality 239
  - 3.4.1. - Migration and the empowerment of women 240
  - 3.4.2. - Migration and violence against women 243

**MDG 4: Reduce child mortality 250**

- 4.1. - Health care versus economic determinants of infant and child mortality 251
- 4.2. - Reproductive patterns and child mortality 253
  - 4.2.1. - The causal link between high fertility / short birth intervals and infant and child mortality 254
  - 4.2.2. - The causal link between very early or very late fertility and infant and child mortality 257
  - 4.2.3. - The link between the desire for children and their survival chances 260
- 4.3. - Other life-saving effects of SRH 262
- 4.4. - Women's roles and child health 264
  - 4.4.1. - Women's education 265
  - 4.4.2. - Women's employment 267
  - 4.4.3. - Violence against women 269
- 4.5. - Migration and child mortality 269

**MDG 5: Improve maternal health 277**

- 5.1. - Additional Targets in national reports 280
- 5.2. - The link between reproductive patterns and maternal health 282
  - 5.2.1. - Inter-pregnancy intervals 283
  - 5.2.2. - Use of contraceptive methods 284
  - 5.2.3. - Very low or very high maternal age 287
- 5.3. - The link between abortion and maternal mortality 288
- 5.4. - The link between maternal mortality and access to SRH services 291
- 5.5. - A new Target under MDG 5: full access to RH 293

**MDG 6: Combat HIV/AIDS, malaria and other diseases 301**

- 6.1. - Gender aspects of HIV/AIDS 303
  - 6.1.1. - The feminisation of the HIV/AIDS epidemic 304
  - 6.1.2. - The nature of HIV risk factors in women 305
- 6.2. - Integrating SRH and HIV/AIDS-related services 310
  - 6.2.1. - Mother-to-child transmission (MTCT) 317
- 6.3. - The need to focus on the youth 320
- 6.4. - The link between migration and the spread of AIDS 324
  - 6.4.1 - Disease transmission 325
  - 6.4.2 - Hardships upon arrival 327
  - 6.4.3 - Medical brain gain 327
- 6.5. - A new Target under MDG 6: universal access to treatment for HIV/AIDS 328
  - 6.6.1. - Malaria and RH 329
  - 6.6.2. - Malaria and migration 330

**MDG 7: Ensure environmental sustainability 341**

- 7.1. - The link between population growth and environmental sustainability 347
- 7.2. - Population and the sustainable use of space 353
  - 7.2.1. - The role of migration 359
  - 7.2.2. - The role of gender factors 364
  - 7.2.3. - Population distribution and environmental vulnerability 366
- 7.3. - Population and access to safe drinking water and basic sanitation 368
  - 7.3.1 - Population determinants of the expansion of basic sanitation in the LAC region 371

- 7.4. - The link between population growth and the growth of urban slums 374
  - 7.4.1 - The link between migration and the growth of urban slums 380
- 7.5. - A new Target under MDG 7: the protection of biodiversity 382

## **MDG 8: Develop a global partnership for development 395**

- 8.1. - Official development assistance (ODA) and population issues 395
- 8.2. - Essential RH drugs and supplies – Target 17 398
- 8.3. - International agreements on migration 399
- 8.4. - International agreements on remittances 401
